

Excursion 2025

Cass III Educational Trip to Science City

Date: 21 November 2025

Venue: Science City

An educational trip to Science City was organised for the students of our school to provide them with practical exposure to scientific concepts. The students were accompanied by their teachers and the journey began at 10 a.m. with great excitement.

On reaching Science City, the students were taken to various galleries, including the Dark Ride, Evolution Park, Time Machine, and the Dynamotion Hall. The interactive exhibits and live demonstrations greatly enhanced their understanding of scientific principles.

Students also explored the outdoor Science Park, where they participated in hands-on activities and observed scientific models in real life. The visit helped them connect their classroom learning with real-world applications. Teachers guided them throughout, ensuring that learning took place in an enjoyable and engaging manner.
